

Q1® Paint Cup System

**Mix, Paint,
Reuse.**

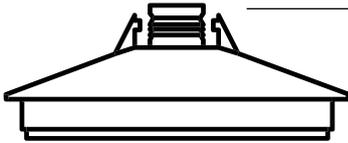

Q1[®] Paint Cup System

Elevate the performance of your painting jobs using our Q1[®] Paint Cup System: Mix, Paint and Reuse. Discover all features and benefits of our all-round solution.

- **Sealing cap**

Designed for improved paint durability.

- **Lid**

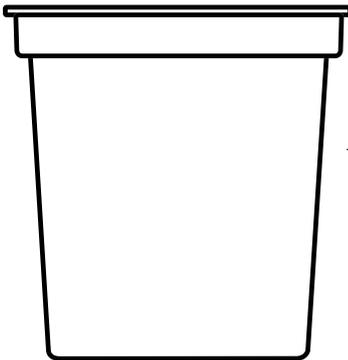

Engineered for easier connection between adapter and spray gun.

Incorporated filter (125 µm or 190 µm).

- **Collar**

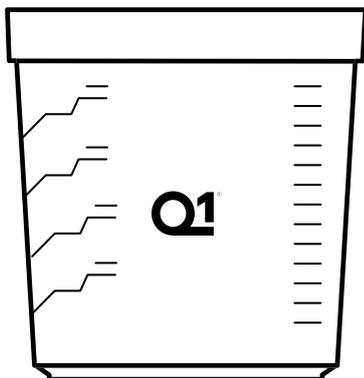

¼ turn lock for a fast and safe closure system. Large ring to prevent leaking due to incorrect locking.

- **Flexible cup**

Superior fitting to the lid for a greater usability.

Made of flexible material used for both mixing and painting, saving costs and time in the painting process.

- **Rigid cup**

Easy to read and durable printed scale.

All-round solution which allows the same cup to be reused for your next painting jobs.

Made with Recycled Plastic:

Collar 100%, Rigid cup & Lids 20%, Flexible cup 10%.

Each Q1[®] Adapter can be purchased as single unit or in packs of 50 pcs.
If you don't find the right adapter, contact us: info@mastik.com

How to choose | Cup size

Save money by choosing the right cup size based on the number of panels in your application.

How to use | Mix, Paint, Reuse.

STEP 01

Insert the flexible cup into the rigid cup.

STEP 02

Mix paint directly inside the Q1® Paint Cup System.

STEP 03

Close the cup with the lid and screw the collar for a safe closure system.

STEP 04

Select the right adapter and connect the gun to the air line.

STEP 05

Paint your car and **Reuse** our Q1® PCS to start a new painting job thanks to our reusable rigid cup. The flexible cup allows the paint to be stored and reused without any risk of the paint leaking.
