

# TEXTILE PROTECTOR

**INGENIOUS  
CAR CARE**

Products for professionals

## Description:

Cartec Textile Protector is suitable for use on all textiles and leathers. It provides optimal protection against water-based liquids.

## Product benefits:

- ✓ This product provides a neutral finish and does not make surfaces slippery.
- ✓ Cartec Textile Protector allows the surface to continue breathing. This makes it ideal for protecting leather.
- ✓ Cartec Textile Protector can be used on almost all textiles and leathers.

## Application:

Textile Protector protects new and cleaned textiles, such as carpets and upholstery, as well as Alcantara and leather, from stains and dirt caused by water-based liquid spills.

## Instructions for use:

⚠ Process the product in a well-ventilated area. To prevent excessive inhalation, the use of a respiratory mask is advised.

When used on textiles:

1. Pre-clean the textile with Cartec Textile Cleaner (1204) or Cartec Interior Cleaner (1205), then allow it to dry before applying Cartec Textile Protector.
2. Thoroughly mist the upholstery with Cartec Textile Protector. Ensure the surface is fully moistened. Avoid forming drops. Immediately remove any Textile Protector from areas that do not require protection using a clean microfiber cloth.
3. Leave the treated surface to dry for 60 minutes, then repeat the treatment. In most cases, two layers are sufficient to achieve optimal protection.

When used on leather:

1. Clean the leather with Cartec Interior Cleaner (1205) first, then allow it to dry.
2. Spray the Textile Protector evenly onto the leather. Apply a second layer after 60 minutes. Finally, rub the Textile Protector in with a microfiber cloth or application pad to achieve an even, neutral finish.

The treated surface takes about 2 to 3 hours to dry, whether it is leather or textiles. After this time, the protection will take effect. Make sure there is adequate ventilation during the drying process.

## Tips & Tricks:

- ✓ Absorb spilt liquids with a tissue or moisture-absorbing cloth; do not rub.
- ✓ Suitable for use on boat and caravan upholstery.
- ✓ It is also suitable for protecting furniture, curtains, table linen and lampshades.
- ✓ It is also suitable for garden furniture and awnings.
